Worked on a shipping application developed for both ios and android analytes.
- **Delivery Application**: An application build for US clients for shipping and delivery of goods.

2020 Mar – 2020 Jul
Lahore, Pakistan

Software Engineer, ISoftStudios

2019 Oct – 2020 Feb
Lahore, Pakistan

I have a strong experience at ISoftStudios working as a Rails developer. I preserved and introduced new features to the following projects

- **MySMSF**: It is an Australian company's project that holds an investment in Crypto, Bitcoin, Gold & Diamond. It allows clients to set up a super fund, to invest to purchase property, to invest in crypto
- **Space-rental**: It is a platform for users to purchase and sell their properties by uploading their details.

ReactJs Developer(Internship), NetSol Technologies

2019 Jul – 2019 Sep
Lahore, Pakistan

My function and responsibilities have been to create an application using the Reactjs developer.

- **Mosawar**: It was a web-based application that used to react as a frontend and firebase as a backend. Painters will use it to sell their drawings and works of art and raise money through a digital channel instead of selling it locally.

Projects

Digital Salon, FYP ⬀

A digital salon network that brings people to the barber. People can use the app to pick resources and save their time.

Developers Connect, Learning

An application in which developers can find others, see their work, knowledge, education and work together around the globe.

Mosawar, Professional

Forum for designers, painters and decorators to sell their works online.

Certificates

- jQuery ⬀
- React Fundamentals ⬀

- Learn Git ⬀
- npm - Mastering the Basics ⬀
